AL-HADI
academy

Delivering academic excellence
in an Islamic atmosphere

All praise to Allah Subhanahu wa Ta'ala, for providing us this great opportunity to serve the community and groom the leaders for tomorrow, equipping them with high standard academic education in a true Islamic environment.

THE PHILOSOPHY

Al-Hadi Academy aims to uphold the chastity and purity gifted to children by Allah Subhanahu wa Ta'ala, while grooming them with comprehensive quality learning and personal traits as social etiquettes, cultural values, religious understanding, creative thinking, humility, and honesty. Our system of instruction is designed to provide the best academic and Islamic education, and make them confident and conversant, and capable of achieving success in any walk of life, be it professional career, religious understanding, social interaction, or physical sports.

Although good education is offered by some advanced educational systems, where they lack in the child's development is the religious understanding. Religion constitutes a very major part of our everyday life, and this lack of religious understanding creates a lot of confusion, complexes, and lack of confidence in ones own faith and believes. Our educational system is designed to maintain high standard of education in both academic and religious studies, using advanced coaching techniques which do not feel like a burden, but is rather a pleasant and interesting experience.

We believe that modern academic education is important to be in control over the worldly matters, and religious knowledge and understanding is important to have control over ones own self, to becoming a constructive member of society.

MISSION:

To establish a comprehensive and balanced educational system that offers academic excellence and promotes true Islamic values, utilizing modern learning technologies and techniques which contributes in character-building, including ethical, social, behavioral and cognitive development, of every child.

VISION:

In the next 10 years we should have developed an educational institution that has successfully developed at least 70% of our graduating students who prove to be an educated muttaqi - effective in their personal, family, professional and social life.

GOALS OF THE SCHOOL

- To build Islamic personality and moral ethics by introducing a comprehensive educational system entirely based on divine Islamic teachings
- To educate children in a way that enables them to reach highest levels of success, and play an active role in the society.
- To promote universally accepted values of tolerance, honesty, mutual respect, peace and good citizenship.
- To establish an effective educational program that responds to the diversity in the personality and capabilities of students, maximizing each student's potential.
- To provide a very congenial and progressive environment for both students and staff.

UNIQUE CURRICULUM

Individuals at young age tend to respond more to indirect learning. Our whole system is designed to instigate active learning in both academic and religious teachings.

MORNING ASSEMBLY

- Planned and prepared assembly with days allocated to different themes
- Students preparing and presenting on special days, like Ghadeer, Earth Day, etc
- Confidence building by Active Student Participation
- Daily presentations on educational and ethical topics by students
- Daily Active Learning topics delivered by students through Role Playing

QURANIC TEACHINGS

- Use of effective methodology of learning Quran, adopted from Muhammad Hussain Tabatabai's institute of Hifz-e-Quran at Qom, Iran; and delivered through faculty qualified from Madressa e Jami'yat uz Zahra, Qom, Iran.
- Teaching 68 Quranic Ayat using hand signals and actions, with a moral story associated with each Ayat, e.g. being good to parents, salam, etc
- Fast Nazara teaching using hand signals and actions for A'araab, words, Ayat and Suras
- Hifz e Quran with meaning and comprehension using unique Learning Techniques based on modern research done in Iran, Qom

ARTS & SCIENCE EDUCATIONS

- Active learning using flash cards, blocks, real life material etc.
- Science experiments in classes starting from Junior section
- Well-equipped Computer Lab and other state of the art facilities
- Science Projects and Presentations.
- Regular arts & crafts classes for promoting asthetic.
- Odd, even, add, subtract, and other Math functions through activities

LANGUAGE LEARNING

- Spelling and speaking in both British and American accents by Foreign Teachers
- Urdu and English hand-writing, Creative Writing, and Arts competitions
- Spelling contests, word-puzzles, Similes, etc

CO-CURRICULAR ACTIVITIES

- Focus on special days like Youm e Hussain, Shab e Qadr, Youm e Quds, etc
- Educational trips to Zoo, OUP, etc
- Sports, Quiz, Speech, and Tableau competition

RECOGNITION & ENCOURAGEMENT

- Quick feedback and Awards on achievements
- Publishing articles and essays written by students in Tahira magazine
- Projects display in Parent-Teachers Meeting
- Personality grooming of challenging students through active participation

SPECIAL COUNSELING FUNCTION

- Experienced counselor for resolving educational, ethical and social issues faced by the students, and developing the child's personality.
- Counseling with parents to resolve any issues affecting the child's development
- Counseling with teacher to improve education and nurturing of students in classes

FUTURE PLANS

To accomplish our mission of establishing a comprehensive and balanced educational system, we have determined to work on the very basics, our youth, so that we can have a better and brighter future. By ensuring that the foundation is strong, we ensure that the building is accurate and reliable. Hence, rather than starting all class-levels simultaneously, where students will be coming from varying educational systems and cultures, being different in their sense of values and beliefs, we have started from the foundation. We are presently educating pupil from Nursery up till Class III, and plan to take the education level up to matriculation or O'Levels.

E-LEARNING PROJECT

We also plan to use the modern technologies and tools in learning. Our e-learning project will be entirely web-based, providing a complete learning solution for children, enabling them to study from home. This would require a lot of resources, and involves several phases, including website development, designing and implementing courses, recording effective training videos, evaluation and feedback mechanism, and so on.

TEACHER'S TRAINING PROGRAM

Although there is no shortage of subject-matter experts, most of the academies and institutes have difficulty finding the teachers who can effectively transfer their knowledge to students. We intend to rectify this issue by providing Teacher's Training to teachers, so that they can teach more effectively. This program will be open to all institutes and individual, and will aid in achieving our aim of providing excellence in education

FINANCIAL ASSISTANCE TO DESERVING STUDENTS

- A comprehensive financing plan in place for the deserving candidates screened through a transparent and confidential mechanism.
- 40% of the students availing scholarships
- Up to 100 % financial assistance provided to deserving students

FINANCIAL FIGURES

	Syed	Non-Syed	Total
Total Students	140	147	287
Students on Scholarship	103	82	186
Total Scholarship Amount	101,250	74,000	175,250

FACULTY MEMBERS

Ms. Rubina Jawad

Principal
MSc, B.Ed
Established Fatimiyah girls college from scratch; Remained actively involved in teaching and administration of different reputed organizations
